Project "Right of Education"

Hiring a Teacher

Education is a fundamental right that has been denied due to the pandemic situation to these children for a long time. There is no possibility for the children to participate in online classes, as the infrastructure is missing and there is no mobile reception in the area which would allow to participate to the lessons by phone. Recently, morning school classes were restarted. For this reason, we would like to hire a teacher who takes care of the children in the afternoon and helps them with the homework, so that they can catch up on the missed school material (learning content).

Sustainable Support

All these families live way under the poverty line with very limited opportunities and perspectives. This is a sustainable project that raises the educational level of the children and thus improves their lives as well as their future prospects.

In this remote region of Marampaqui (80km from Cusco), we have been active since several years, supporting the local population through the operation of a medical center and community projects.

Project Period and Budget

Project start beginning of March 2022

Project end end of February 2024

Costs	per month	per year	during the entire project
