Con Corazón Outreach Report

25th April 2022 – Marampaqui

Today was a very intense day. We did not expect to see so many patients sitting next to the medical center. As usual women are the ones who come more often. However, this time there were many men. The reason is that we offered them dental prosthesis treatments, through radio advertisements.

Saulo Gamarra, director of Con Corazón, selected the potential candidates for the elaboration of dental prostheses. Many of the unselected patients returned home very sad, without the possibility of having these prostheses. The main reasons were that they had a lot of extractions to do.

Activities

As always, people wait for our arrival. They seems to be happy with our prescence.

- General Medicine, 25 patients were seen.
- Dentist, 13 patients kept the dentist busy.
- Laboratory, 09 lab exams were performed by our biologist Wendy.
- Pharmacy, besides the regular work delivering medicines, Jhoni is helping translating when needed.
- Nurse, was busy helping Dr. Saulo with the patients' selection.
