Con Corazón Outreach Report

19th April 2024 – Marampaqui

Serving our patients is what characterizes us. We are a team that facilitates access to health for our patients through treatments for various diseases specific to the region and common habits of the residents. We do it knowing that they have fewer opportunities than us and less access to many fundamental rights.

Our patients did not choose where they were born, nor the conditions in which they live. Their health is conditioned by political decisions, the environment, the precarious existing health system, the level of education in schools, limited access to a balanced diet, housing conditions, hygiene, etc.

We know this reality and we are proud to contribute to improving living conditions, especially for our patients.

Activities

Medicine, we have seen 25 patients.

Dentist, 12 patients

Laboratory, 08 lab tests were done.

Health promotion for all our patients.

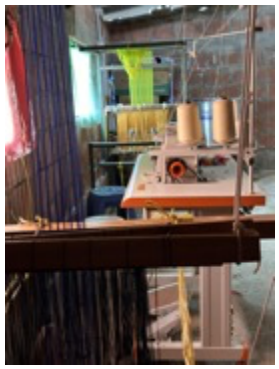
Photo Gallery



Some inhabitants of Marampaquí decided to weave alpaca wool and then sell their products. This new workshop is located 5 meters from our medical center.
