Con Corazón Outreach Report

26th February 2025 – Marampaqui

Anthony Champi has just graduated from dental school. He is currently completing his pre-professional internship, a fundamental requirement before obtaining his Dental Surgery Certificate. The Dental School of the Andina University of Cusco contacted our institution so we could welcome Anthony to our dental clinic as part of his professional training. Our team will evaluate his performance, providing him with the necessary opportunities to gain the clinical experience this responsibility demands.

During this phase, Anthony is actively involved in various activities: performing dental restorations, preventive treatments, giving health promotion talks at educational institutions, and also assisting the main dentist when necessary. His week is organized to fulfill these duties in different locations.

He works at our dental clinic in Cusco, but also travels to our dental office at the school in Lucre, a rural area located an hour from the city. He also participates in visits to Marampaqui, where he is already a familiar face to many patients. In this community, he performs dental cleanings, offers educational talks on oral health, and assists in the treatment of the most complex cases.

Activities

Medicine, we have seen 25 patients.

Dentist, 13 patients

Laboratory, 13 lab tests were done.

Health promotion for all our patients.

Photo Gallery

A father trying to encourage his young daughter to undergo dental treatment. This gesture convinced the girl, and she has now become a cooperative patient. Our dentist greatly appreciates it.

Child patients always bring a smile to our souls. The Con Corazón team is ready to restore and/or maintain their good health. What a privilege we share.
