Con Corazón Outreach Report

25th March 2025 – Marampaqui

Our medical center in Marampaqui has been facing ongoing issues with its plumbing system, which has impacted our daily operations and the comfort of our staff. The problems have not only affected the toilets, but also the sinks and the overall pipe system. Functional plumbing is essential for maintaining hygiene and ensuring that our medical staff can work in safe and sanitary conditions.

Due to the lack of local plumbing services, we had to hire a professional plumber from Cusco. He traveled to Marampaqui twice—first to assess the situation and then again to complete the repairs. During his initial visit, he carefully inspected the system and identified the specific issues that needed to be addressed. On his second visit, he brought all the necessary supplies and tools to fix the problems.

Our team is happy to have it restored!

Activities

Medicine, we have seen 25 patients.

Dentist, 13 patients

Laboratory, 12 lab tests were done.

Health promotion for all our patients.

We took advantage of Orlandos presence to fix the electrical system. Although he's a plumber, he also has knowledge of electricity.
