Con Corazón Outreach Report

13th August 2025 – Marampaqui

Today we reached an important milestone in the greenhouse project. After purchasing the supplies, we distributed materials such as iron bars, plastic tubes, covering plastic, nails, and wooden planks to the beneficiary families. These resources will allow them to complete their greenhouses, promoting sustainability and food security.

Each family was required to contribute their labor by preparing the foundations and lower walls. This condition encouraged responsibility, participation, and ownership. With today's delivery, they now have the tools to finalize their structures.

Additionally, we had the pleasure of welcoming Dr. Ambar Suclly, a local general physician, who joined as a volunteer. Her presence brought joy and motivation, highlighting the importance of solidarity in health and community projects.

Overall, the day combined concrete progress in our agricultural project with an inspiring act of solidarity in healthcare, reinforcing the importance of collaboration and community engagement. Stay tuned for the Greenhouse project outcome!

Activities

Medicine, we have seen 25 patients.

Dentist, 13 patients

Laboratory, 8 lab tests were done.

Health promotion for all our patients.

Photo Gallery

It is time to paint our Medical Center. The people will coordinate a painting activity day. The harsh weather in the highlands forces us.

Dr. Ambar in action. Such challenging cases for the day. Though she was very satisfied with the work she did.

We brought the greenhouses supplies from the city of Cusco. Afterwards a coordination meeting with the beneficiaries.
